**RECENT SUCCESS STORIES**

- **WIBOTIC** is developing wireless power solutions for robotic systems based on technology from Professor Josh Smith’s lab. Propelled by two Innovation Gap Fund awards and incubated at CoMotion Labs, Wibotic de-risked their technology, identified target markets, and raised capital to grow their company. Wibotic is now poised to lead the charge in powering autonomous systems.

- **ALTPEP** was spunoff from Professor Valerie Daggett’s research group to address a critical need: Alzheimer’s detection and treatment. Fueled by Idea to Plan training, an Innovation Gap Fund award, and a Postdoctoral Commercialization Fellowship, AltPep launched in CoMotion Lab’s incubator, working towards a day where no one has to live with Alzheimer’s disease.

- **ALL PATIENTS SAFE (APS)** is a training program developed to help prevent suicide. An Innovation Gap Fund award enabled co-founders Drs. Jennifer Stuber and Anna Ratzliff and their teams to advance their technology and strategically define key markets, allowing them to address an unmet need behind “the nation’s most preventable form of death.”

Dr. Ingrid Swanson Pultz began working with CoMotion in 2011 to launch PvP Biologics. Bolstered by two CoMotion Innovation Gap Fund awards, a Postdoctoral Commercialization Fellowship, and contributions from CoMotion mentors, Dr. Pultz and her hard-working team developed a novel therapeutic for treating celiac disease. In 2020, Takeda Pharmaceuticals acquired PvP Biologics for up to $330 million in upfront and milestone payments.
