308 All-time UW spinoffs built on foundational UW IP

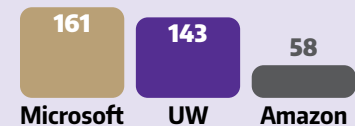

133 currently active

3,165 Employed at UW spinoffs

1,430 based in Washington

Second only to Microsoft

143 of 625 startup founders trace their roots back to the UW.

Innovation in action

Zap Energy is advancing clean energy with compact fusion technology that eliminates the need for expensive superconducting magnets. Built on UW research, it has raised more than \$300 million in private and government funding toward commercial fusion power.

Aquagga is developing technology to permanently destroy PFAS "forever chemicals" in contaminated water. Spun out of the UW and University of Alaska – Fairbanks in 2019, it has deployed pilot systems with industry and government partners and earned multiple federal awards to advance commercial deployment.

Ora Biomedical is developing small-molecule therapeutics targeting the biology of aging to extend healthy lifespan. Spun out of the UW School of Medicine in 2022, it combines robotics, AI, and high-throughput drug discovery, and has won NIH SBIR funding.

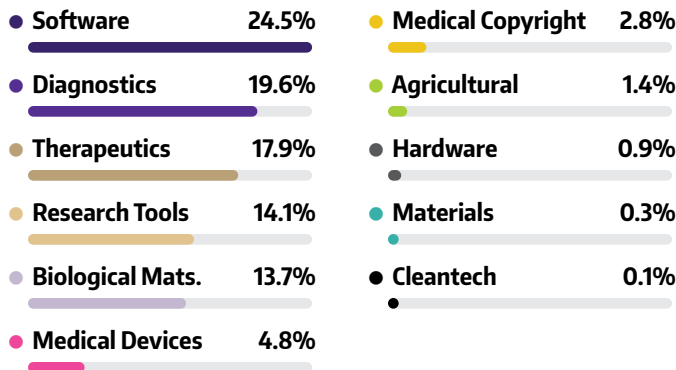

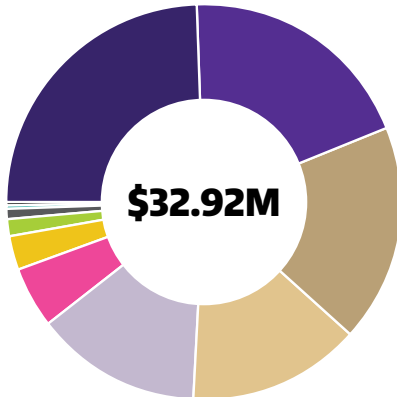

Spun out of the University of Washington's College of Education in 2024, Colleague AI provides an AI platform for teachers, students, and school leaders. Its tools support lesson planning, assessment and grading, student tutoring, and school administration.
