HOW COMPASSION IMPROVES INNOVATION

5/10/19

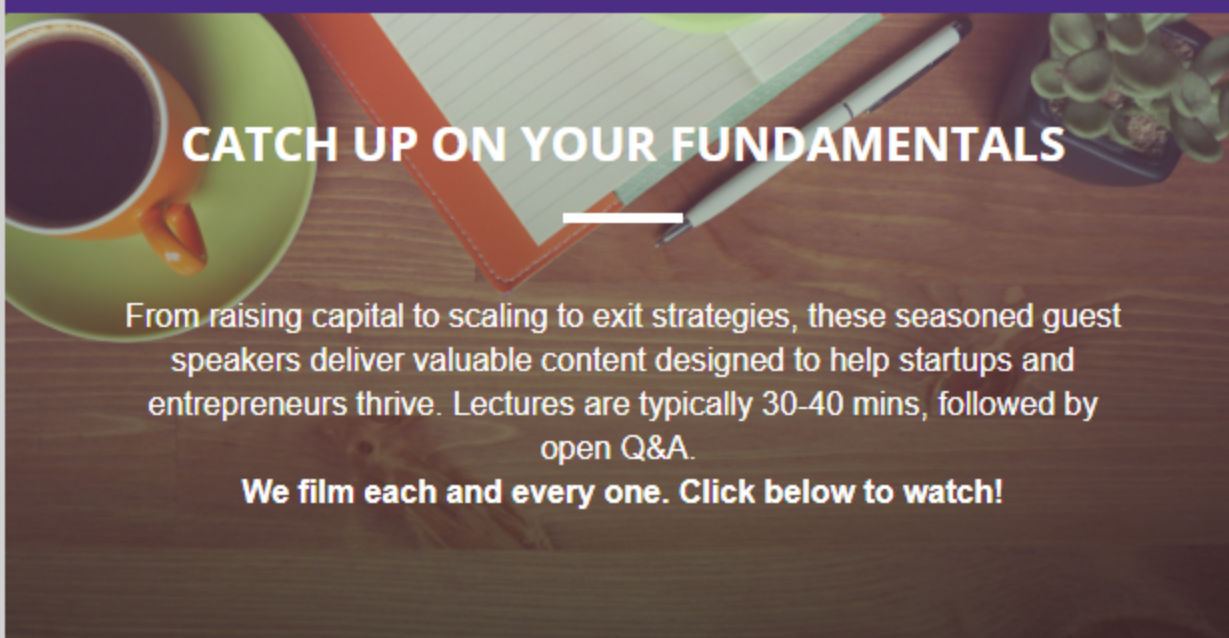

With **Shwetak Patel**, professor, Paul G. Allen School and the UW Department of Electrical & Computer Engineering. If your vision is to improve lives with your business or idea, compassion must be a key component. Advancing revolutionary solutions requires deep listening, empathy, interpersonal connections, and networks of contributors who operate in an environment of trust. To move beyond existing innovation and business models to address more universal challenges requires us to weave compassion more deeply into our processes - to build a more inclusive approach that emphasizes outcomes which improve lives, not just balance sheets.

Topics include:

- The power of compassion in innovation
- Envisioning a compassionate business model
- Connecting with like-minded contributors
