Meet a CoMotion Team Member

As CoMotion Labs' manager of the hardware incubator, **Brady Ryan** loves working with entrepreneurs who are solving huge technical problems in order to bring innovative products to market. "Half of what our members are working on seem like sci-fi. The velocity of their progress in the space is incredible, and the impact that these technologies will have on real people is amazing." Brady returned to Seattle after spending three years in Spokane opening and running CoMotion Labs' virtual incubator for companies in eastern Washington's vibrant startup ecosystem. While on "the real east side," he received his MBA from Gonzaga University. Brady loves developing partnerships, learning how to use the equipment in the hardware incubator, and pitching his startups to local investors. Outside of work, he is a caricature of a PNWer: hiking, skiing, camping, fishing and drinking overpriced craft beers. [Find Brady on LinkedIn.](#)
