Innovation

CoMotion Park

If you're a manager working at the University of Washington, you may be receiving a call from a company called Axios. As you're not sure what it entails, you decide to ask your professor about it.

Professor Smith, CEO of OctoML, a machine learning company, is providing a full-time浸润式 summer internship opportunity to students. This internship involves gaining hands-on experience in machine learning projects alongside the company's veterans. Students will work on developing light-enabled and cell-based technologies, among other things. The company is also offering a one-time $5,000 stipend to the selected students.

Professor Smith's vision is to connect students with their research and teaching advisors to support the development of new technologies. The interns will be working on projects that are full-time and will run for 10-12 weeks. This full-time internship is a great opportunity for students to learn and develop their skills.

If you're interested in this opportunity, you can find more details on the CoMotion website.
